IP528 - External Button Handset

Description

The IP 528 is an analogue to digital interface designed to allow additional hospital equipment such as blowpipes and pressure mats, to be connected and act in the same way as a IPIN nurse call handset.

The enclosure has two outlets, 1/4" jack and a 3.5mm jack providing an analogue connection to the IPIN bed head unit.

Features

- Flanged lid - perfect for wall or shelf mounting and enclosure security.
- Flame retardant ABS plastic
- 1/4"(6.35mm) and 3.5mm Mono jack outlets
- Normally closed circuit devices acceptable
- Voltage free contacts
- Handset fault if unplugged from bed head unit - sounding alarm
- Acts as a nurse call when circuit is broken sounding a nurse call alarm. i.e. Button pressed or device removed.
- Supplied with 1.8M cable to connect to IPIN Handset Jack

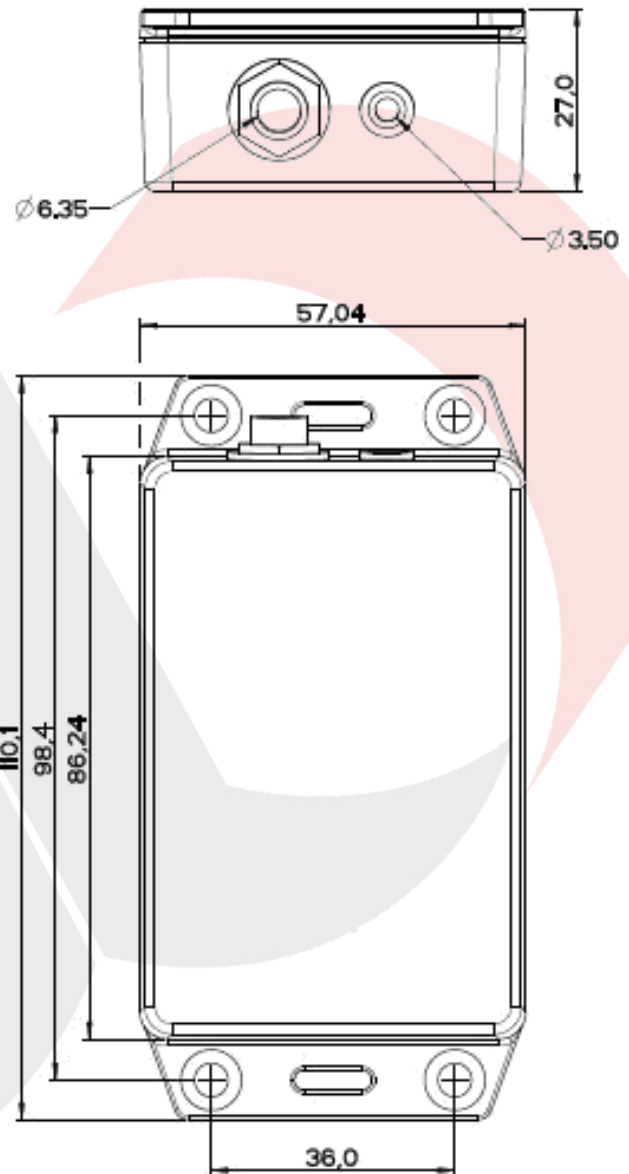

Availability

The IP 528 is available in a Black ABS Plastic Enclosure with a flanged lid.
