The Wandsworth Disabled Person’s Call System, for use in toilets and bathrooms
The Wandsworth Disabled Person’s Call System, for use in toilets and bathrooms quickly enables location of any person who is in difficulty.

Remote Indicator Panels
Remote indicator panels for multiple disabled person’s call systems. These panels would normally be located in a centrally staffed area (e.g. reception or security office) of the building and all toilet/bathroom calls would be routed back for indication of alarm calls.

There are four standard indicator panels, each with 1.1 Watt amber indicator lamps, one mini bleep tone buzzer and rocker switch for muting buzzer. Standard Engraving: MUTE BUZZER.

Ceiling Pull
A white surface mounted ceiling pull unit with a 3 meter amber cord. The unit contains an integral reassurance light 2.5 watt with amber lens. Unit is supplied with 2 amber ring pull units (QD351) or 1 amber acorn pull unit (QD322). Unit fits BS31 box with 50.38mm centres.

Call Unit
An extra/alternative unit to the QD322/QD351, the unit consists of a front cover plate measuring 86mm square and containing an orange call button marked with a nurse call symbol. There is a red LED reassurance light above the button.

Reset Unit
Used in conjunction with a call unit (QD321) or ceiling pull (QD322/QD351). The QD324 unit is also supplied as part of the QD350 complete system. Front cover plate measuring 146mm x 86mm containing; reset push with integral reassurance light 1.1 watt with amber lens. PCB components wired to terminal block.

Overdoor Lamp/ Tone Generator
Providing both an audible and visual call signal, the QD322 unit is also supplied as part of the QD350 complete system. The front cover plate measures 146mm x 86mm and contains: One 2.8watt MES lamp. (Lenses QD337, are to be ordered separately; see below for details). One mini bleep tone generator. Component wired to terminal block.

Single Overdoor Lamp
Usually mounted above the toilet door, this unit comprises a front cover plate 86mm square containing: One 2.8watt MES lamp. (Lenses QD337, are to be ordered separately; see below for details). Component wired to terminal block.

Overdoor Lamp Lens
Lamp lenses, 36mm square, are available in amber (A), red (R), green (G), blue (BL), or clear (CL). Please specify colours and quantities of each required.

Power Unit
Input 230V 50 Hz, an earth connection is required. Rated output 1A 24Vdc. Output fuse 1A quickblow 20mm x 5mm. Size: 200mm W x 100mm H. Weight: 1.5 KG.

Complete System
The QD350 complete system (Flush Mounting) comprises the following components:
1 x QD351 Ceiling Pull
1 x QD324 Reset Unit+ Flush box 1703/G
1 x QD331 Overdoor lamp/tone generator+ Flush box 8302/G
1 x QD337/A lens
1 x QD153 Power supply unit
